Divide and conquer 1

Points	16.37	Memory limit	32MB
Time limit (case)	1s	Time limit (total)	60s

Descripción

Edgardo se puso un poco intenso este semestre y puso a trabajar a sus alumnos con problemas de mayor dificultad.

La tarea es simple, dado un arreglo de números enteros debes imprimir cual es la suma máxima en cualquier subarreglo contiguo.

Por ejemplo si el arreglo dado es {-2, -5, **6**, **-2**, **-3**, **1**, **5**, -6}, entonces la suma máxima en un subarreglo contiguo es **7**.

Entrada

La primera línea contendrá un numero .

En la siguiente línea enteros representando el arreglo .

Salida

La suma máxima en cualquier subarreglo contiguo.

Ejemplo

Entrada	Salida
8 −2 −5 6 −2 −3 1 5 −6	7
5 1 2 3 4 5	15

Límites
